# Writing Smart Contracts
# 02 Tool Setup

Peter H. Gruber

Supported by the Algorand Foundation

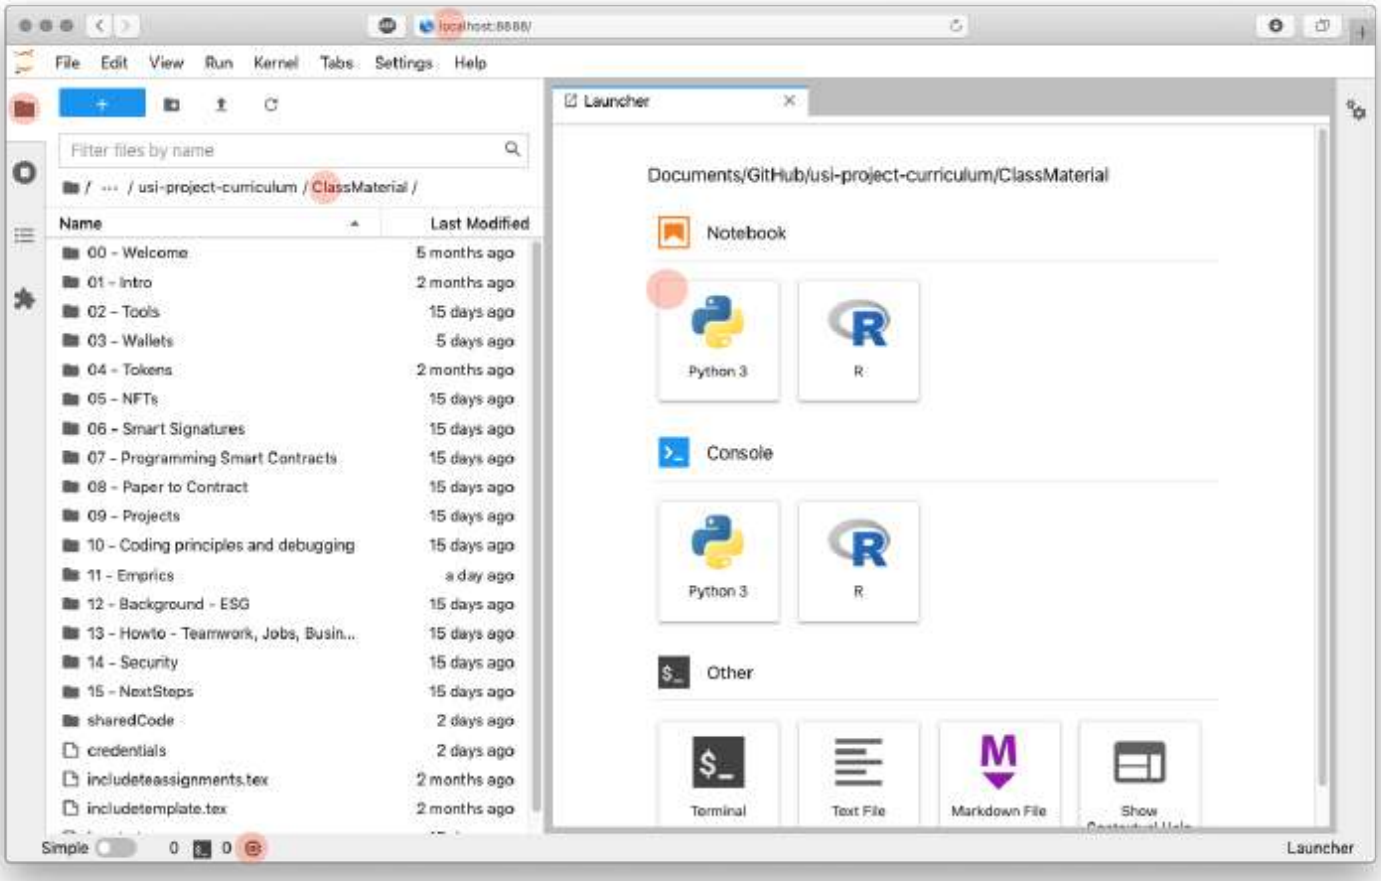
# Anaconda

## (1) Get Anaconda

– `https://www.anaconda.com/products/individual`
– No need to register or create an account
– No need for Cloud Notebooks
– Download and install Anaconda

## (2) Anaconda Navigator

# A quick intro to Jupyterlab



- Notebook (text+code+results)
- Access with browser
- Markdown language
  → `02_WSC_JupyterLab.ipynb`
- Run Python in notebook
  → `02_WSC_Python.ipynb`
- Files in current directory
- Jupyter = Julia/Python/R

# Pera Algo Wallet App – Install

iOS

Android

`https://apps.apple.com/at/app/algorand-wallet/id1459898525?l=en`

`https://play.google.com/store/apps/details?id=com.algorand.android&hl=en&gl=US`

- Create an account (prepare a piece of paper for the passphrase)
- Transfer 1 ALGO to your neighbour

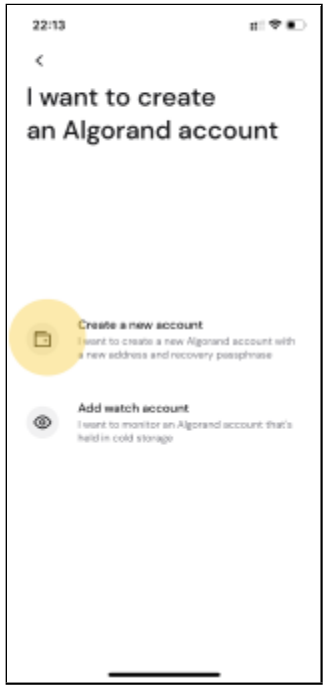
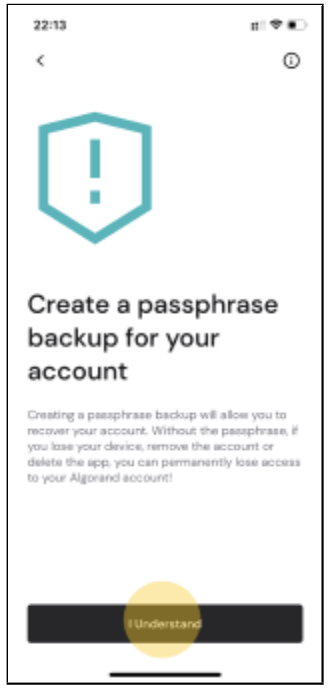
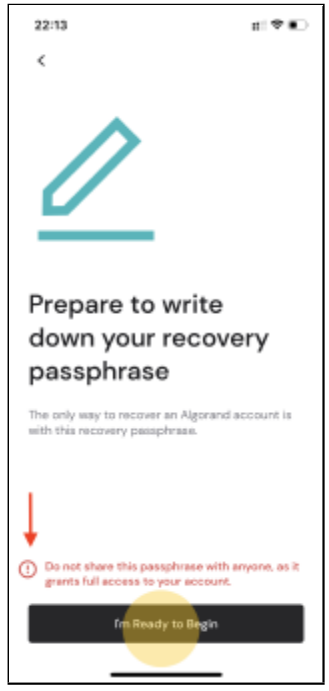
22:13
Add an account
I want to create an account
Create a new Algorand account or add a watch account
I already have an account
Import an existing Algorand account via recovery passphrase or pair your Ledger
By creating an account, you agree to Pera Wallet's Terms and Conditions and Privacy Policy



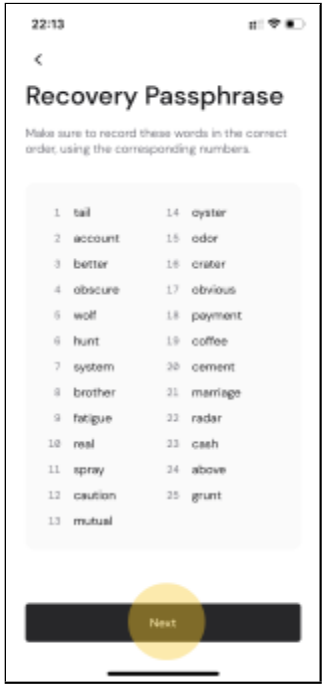
22:13
I want to create an Algorand account
Create a new account
I want to create a new Algorand account with a new address and recovery passphrase
Add watch account
I want to monitor an Algorand account that's held in cold storage



22:13
Create a passphrase backup for your account
Creating a passphrase backup will allow you to recover your account. Without the passphrase, if you lose your device, remove the account or delete the app, you can permanently lose access to your Algorand account!
I Understand



22:13
Prepare to write down your recovery passphrase
The only way to recover an Algorand account is with this recovery passphrase.
Do not share this passphrase with anyone, as it grants full access to your account.
I'm Ready to Begin



22:13
Recovery Passphrase
Make sure to record these words in the correct order, using the corresponding numbers.
1 tail
2 account
3 better
4 obscure
5 wolf
6 hunt
7 system
8 brother
9 fatigue
10 real
11 spray
12 caution
13 mutual
14 oyster
15 odor
16 crater
17 obvious
18 payment
19 coffee
20 cement
21 marriage
22 radar
23 cash
24 above
25 grunt

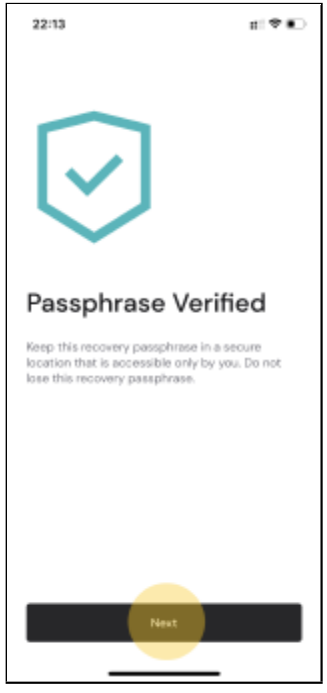
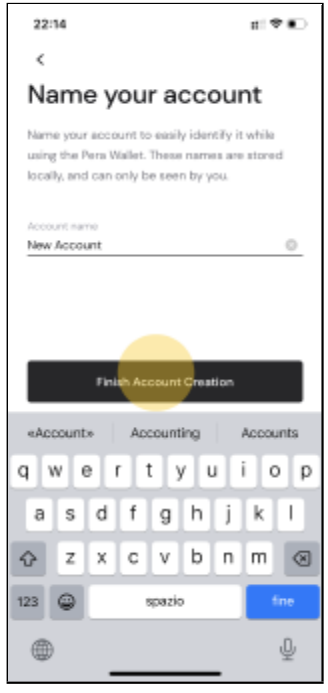
Recovery Passphrase
Screenshot Detected
Do not backup your recovery passphrase by taking a screenshot. Having an image containing your passphrase is a security risk.
Close



22:13
Passphrase Verified
Keep this recovery passphrase in a secure location that is accessible only by you. Do not lose this recovery passphrase.
Next



22:14
Name your account
Name your account to easily identify it while using the Pera Wallet. These names are stored locally, and can only be seen by you.

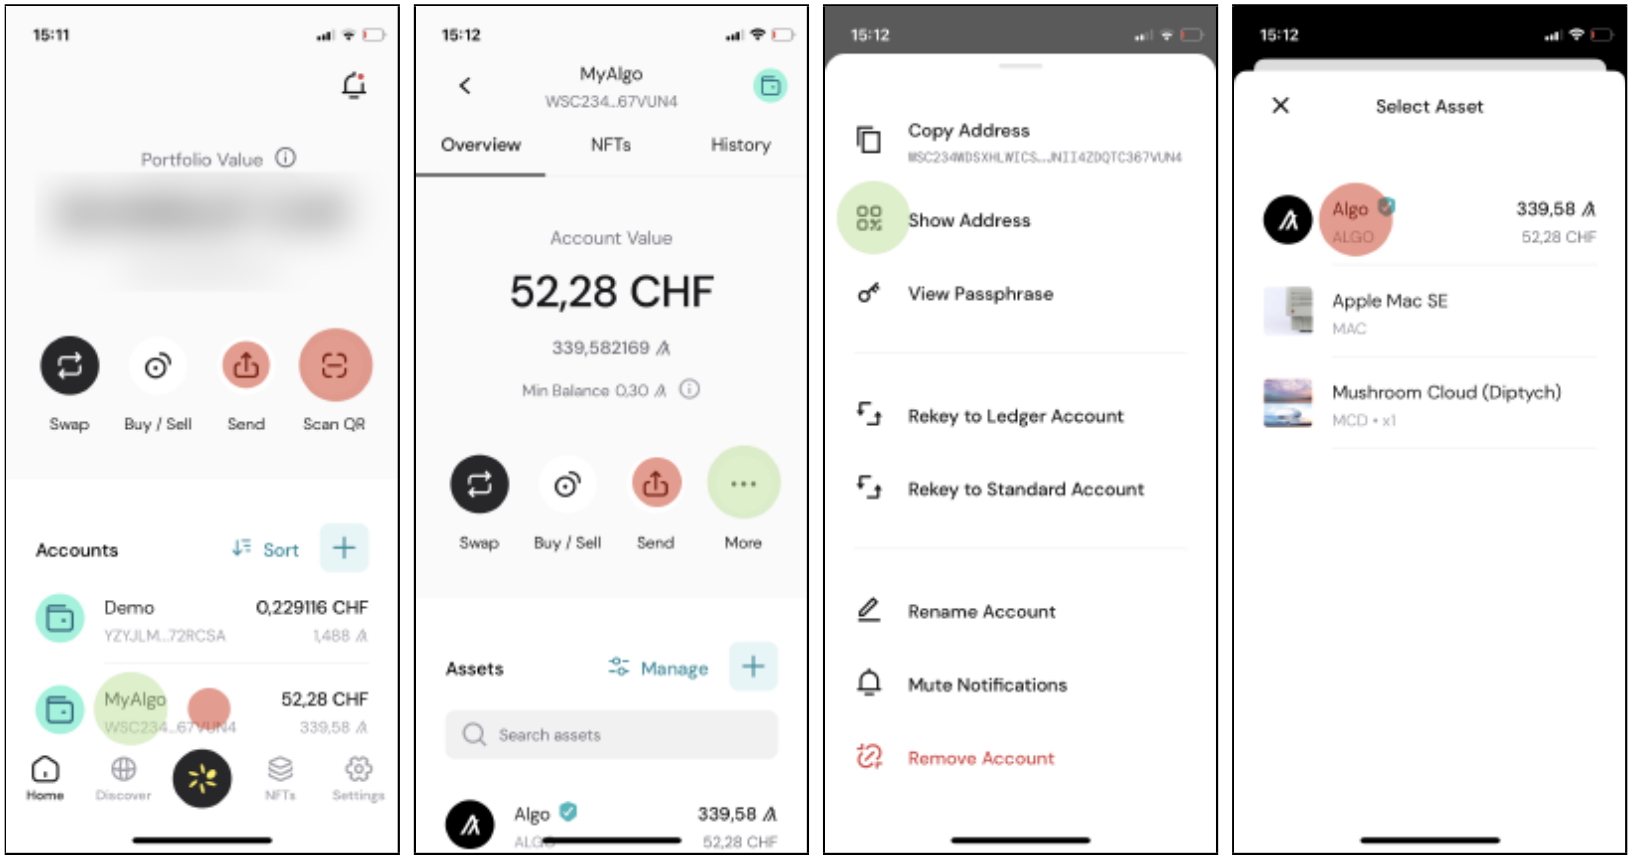
# Pera Wallet App – Make a transfer



RED = send, GREEN = receive

**Testnet:** Cogwheel / { } Developer Settings / Node Settings / TestNet (orange bar)

# Toolstack

## Locally installed

- Anaconda
  - JupyterLab (access via browser)
  - Python + Algorand SDK Library + PyTEAL
- Pera Algo Wallet App for iOS/Android

## API-Access

- `https://algonode.io`
  - Read blockchain data, submit transactions

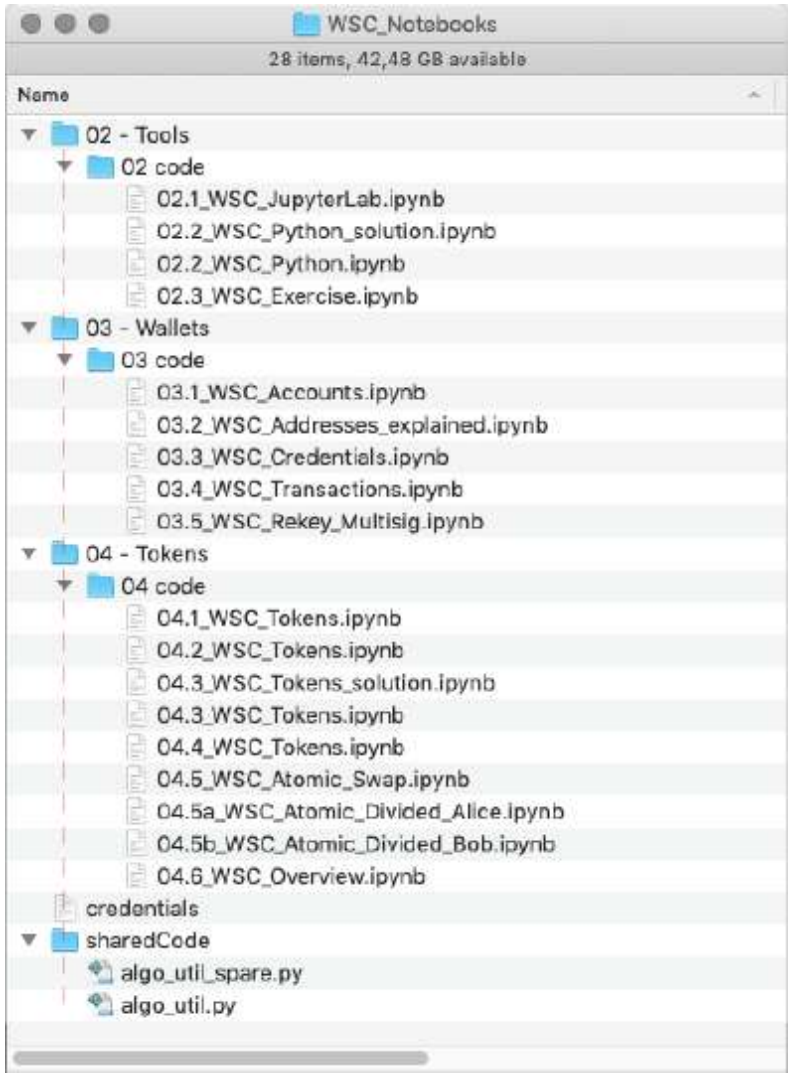
## Web-Access

- `https://explorer.perawallet.app` (simple)
- `https://app.dappflow.org/dashboard` (complex)

## Cloud

- `https://www.pythonanywhere.com`
  - Host web3 apps written in Python

# Folder structure notebooks



**Do not change this structure!** Add new folders in correct level.
