

Writing Smart Contracts

12 Projects

Peter H. Gruber

Supported by the Algorand Foundation

Prepare for the project

- Separate the distinctive phases (see programming style)
 - ▶ Planning – Coding / Documenting – Testing
- Technical and organisational structure should be the same
 - ▶ Each functionality has one responsible group member
- Do not forget testing: make sure the final product works
- Pay special attention to credentials management
- Use versioning
- Better 100% of 80% than 80% of 100%.
