

# Writing Smart Contracts

## 09 Projects

Peter H. Gruber

Supported by the Algorand Foundation

# Prepare for the project

- Separate the distinctive phases (see programming style)
  - ▶ Planning – Coding / Documenting – Testing
- Technical and organizational structure should be the same
  - ▶ Each functionality has one responsible group member
- Make sure the final product works.
- Use versioning.
- Better 100% of 80% than 80% of 100%.
- If necessary, have a look at Section 10: Debugging
