Writing Smart Contracts
08 Examples

Peter H. Gruber

Supported by the Algorand Foundation

Tinyman

- Decentralized trading protocol for the Algorand chain
- Pool-based exchange, economic model of Uniswap
- Create pools for any token pairs
- Sell own tokens
- https://tinyman.org
- Testnet application: https://testnet.tinyman.org

Wallet connect

- Integration of Smart Contract with phone wallet
- Standardized code for multiple wallets
- Works with Javascript framworks such as React
- Example: `https://algorand.github.io/walletconnect-example-dapp/`
- Works both on testnet and mainnet
